

2023 IMPACT REPORT

Today the internet is Safer

With advanced capabilities for detecting child sexual abuse material (CSAM), Safer, built by Thorn, empowers content-hosting platforms to safeguard their platforms and their users. In 2023, more tech companies than ever used Safer. Together, our fierce and daily commitment reveals the power of using technology for good – to build a safer internet.

Files classified as potential CSAM

MAKING YOUR PLATFORM SAFER

Comprehensive CSAM Detection

Detect known and new CSAM with a database of 57.3+ million known CSAM hashes and predictive AI.

Flexible and Scalable

Choose the services and deployment option that meets your needs – and adjust as you scale.

Cross-Platform Hash Sharing

Leverage hashes contributed by other Safer customers and help improve cross-platform intelligence to diminish the viral spread of CSAM.

Proprietary Hashing Technology

Safer offers proprietary perceptual hashing technologies for images and videos.
